

Vox Stellarum:

OR, A LOYAL

ALMANACK

For the Year of HUMAN REDEMPTION,

MDCCCLXXVIII.

BEING

The Second after BISSEXTILE or LEAP-YEAR

In which are contained

All Things fitting for such a WORK; as,

A TABLE of Terms and their Returns;

The Full, Changes, and Quarters of the MOON;

The Rising, Southing, and Setting of the SEVEN STARS,
and other Fixed Stars of Note; the MOON'S AGE, and

A TIDE TABLE fitted to the same.

The Rising and Setting of the Sun; the Rising, Southing,
and Setting of the Moon; Mutual Aspects, Monthly Ob-
servations; and many other Things, useful and profitable.

Unto which are added,

Astrological Observations on the Four Quarters of the Year

An HIEROGLYPHIC, alluding to these present Times;

A remarkable Chronology; the Eclipses;

And other Matters, both curious and profitable.

With a particular Judgement of a visible Lunar Eclipse
and many other Things relating to Astrology.

By FRANCIS MOORE, Physician.

L O N D O N,

Printed for the Company of STATIONERS, 1778.

And Sold by GEORGE HAWKINS, at their Hall

Ludgate-Street. [Price Eight Pence, stitched.]

A plain and easy TABLE, shewing the Time of HIGH-WATER at all these Places under-named.

Note, That the Moon's Age being taken notice of in the TABLE, you have the Time of HIGH-WATER at all the undernamed Places.									
<p>Queenborough, Portsmouth, Southampton, Kentish Knoak, Leith, Beachy, Isle of Wight, Dunkirk, Can- tado, Coast of Flanders, at the Sands and Dover Pier. Graveland Downs, Blackness, Romney, Thanet, Silly Half tide, North Cape before Gocquit, and between Calais and Dover. London, Tinnmouth, Hartlepool, Amsterdum, Whitby, Dort, Galscoin, West of Ireland, at Groir, at Roeter's dam, and in Robin Hood's Bay. Newcastle, Hummer, Falmouth, Severn-mouth, at the Spurn between Scilly and Lizard, Ramsey, Dartmouth, Guernsey, Torbay, St. Mello's. Plymouth, Antwerp, Hull, St. David's, Holms of Bristol, Lundy, St. Paul's, Salcom without Uffan, at Waterford, and at Lynn Half-tide. Bristol-Key, Weymouth Key, Aduborough, Foul- ness, Lins, the Start before St. Nicholas, Sedmouth in the Channel, between Fox and Falmouth. Yarmouth-Road, Harwich, Calais-Road, Dover. Cowes, Caen, the Frith, South-Foreland, St. Helen's Coast of Normandy, and Picardy. Hague, Peter-port, Dublin, between Beachy and the Isle of Wight, Yarmouth, St. Magnus', Sound, Cromby, without the Coasts in the Channel.</p>

	1000	4 3 4	8 16 8	12 10 0	25 0 0	37 10 0	50 0 0

If you would know the Interest of one Hundred Pounds for one Month, look for 100l. in the Side; and in the next Column, under 1 Month, it is 8s. 4d.; for 2 Months 16s. 8d.; for 3 Months 25s.; for 6 Months 51. 10s.; for 9 Months 76. 10s.; and for a Year 100l.; and so of the rest.

This is the honest Way by which Men should
To Interest let their Silver and their Gold;
Yet worldly Milers, when to Raking fall,
They wish their Interest get the Devil and all.

A DIALOGUE upon the DEBATES of these troublesome Times, between HERACLITUS and DEMOCRITUS, the Weeping and the Laughing Philosophers, continued.

DEMOCRITUS.

I burst with laughter, when (confounding state)
I see those rebels hunt their magistrate ;
When I hear porters prate of state designs ;
And make all common, as in new-found Indies.

HERACLITUS.

I weep to see God's glory made a veil
To cover who his glory most assail.
That sacred Faith is made a mask for sin,
And men run head-long to destruction's gin.

DEMOCRITUS.

I laugh (with all my heat) at the transforming
Of juggling Proteus, to all times conforming:
But most I laugh, to have seen the world so mad,
To starve and die, when those damn'd Atheists bad.

HERACLITUS.

To weep (alas) to see the people weep,
Opprest with restless weight in danger deep;
Crying for peace, but yet not like to get her,
Yet her condition is not greatly better.

DEMOCRITUS.

I laugh to see all cause of laughter gone,
'Through those which (yet thou saidst) have caus'd thy morn :
Noting th' old guise, I laugh at all their new :
I laugh at more, but dare not tell it you.

HERACLITUS.

Some sorrows also I in silence keep,
But in the desert all my woes shall weep,
And there (perhaps) the rocks will help me then;
For in these days they are more mild than men.

DEMOCRITUS.

I'll dwell in cities (as my genius guide)
To teach my fill; for laughing peace provide
Such plentiful store of laughing-stuff to fill me,
That still I'll laugh, unlets that laughing kill me.
I knew that princes being born for th' Arts
Which counsels, camps, and dangers school imparts.
The books mark needful and peculiar theirs,
Are politics, of state and state-affairs.

The End.

The INTRODUCTION.

Among the kingdoms and the islands known,
 Throughout the far-extended earth, there's none
 Can with our little Albion's isle compare,
 For plenteous products, noble feats of war.
 Not the dull rugged nations of the North,
 With their tall woods and mines of little worth.
 Nor can the Western world, of which we're told
 They dwell in wealth, and massy mines of gold.
 Nor the vast Eastern empires, where they boast
 Of their rich toys transported to our coast;
 No: nor th' unhealthy Africk's golden coast. }
 Nor slavish France, so fam'd for wine and punk,
 With which they made their neighb'ring nations drunk;
 'Twixt faith and frolick, not to mention worse,
 Enslav'd themselves, and so they would do us.
 Nor lofty Spain, who, in her glorious state, }
 From England's arms receiv'd her ebb of fate,
 And owes her ruin to fam'd eighty eight.
 Nay, Europe's garden, Italy, is poor,
 Compar'd to England's wealth and plenteous store.
 Ah, happy isle! (and did I happy say,
 So I might still, were the lewd crew away);
 Blest in thy situation, happy seat,
 Not in the frozen zone, nor scorcht with heat:
 Thy fertile vallies load the threshing-floor,
 Which makes the rich increase, and feeds the poor.
 Thy fields' fat soil supports the flocks' increase;
 Thy flowery pasture yields the golden fleece.
 Here's all that wise man wants; the rest may buy
 Their toys from France, that shop of vanity.
 But, blest from ruin (Heaven foresaw the thing),
 In a most valiant prince, and glorious queen;
 A prince on whom all Europe's councils wait,
 As well for his advice, as kingly state.

A TABLE of Terms and Returns for the Year 1778.

Hilary Term begins Jan. 23, ends Feb. 12.

Returns or Effoign Days.		Exc.	Ret.	Ap.	W. D.
In eight Days of St. Hilary	Jan. 20	21	22	23	Friday
From the Day of St. Hilary in 15 Days	27	28	29	30	Friday
On the Morrow of the Purif. of Bl. V. M. Feb.	3	4	5	6	Friday
In eight Days of the Purif. of the Bl. V. M.	9	10	11	12	Thursday

Easter Term begins May 6, ends June 1.

From the Day of Easter in 15 Days	May 3	4	5	6	Wednesd.
From the Day of Easter in 3 Weeks	10	11	12	13	Wednesd.
From the Day of Easter in 1 Month	17	18	19	20	Wednesd.
From the Day of Easter in 5 Weeks	24	25	26	27	Wednesd.
On the Morrow of the Ascension	29	30	31	J. 1	Monday

Trinity Term begins June 19, ends July 8.

On the Morrow of the Holy Trinity	June 15	16	17	19	Friday
In eight Days of the Holy Trinity	21	22	23	24	Wednesd.
From the Holy Trinity in 15 Days	28	29	30	Jy. 1	Wednesd.
From the Day of the H. Tr. in 3 Weeks	July 5	6	7	8	Wednesd.

Michaelmas Term begins Nov. 6, ends Nov. 28.

On the Morrow of All Souls	Nov. 3	4	5	6	Friday
On the Morrow of St. Martin	12	13	14	15	Monday
In eight Days of St. Martin	18	19	20	21	Saturday
From the Day of St. Martin in 15 Days	24	25	27	28	Saturday

N. B. Two Sitings at Westminster-Hall on Ascension-day, Midsummer-day, and the second of February.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note, That the first and last Days of every Term are the first and last Days of Appearance.

Commons Notes for the Year 1778.

JANUARY hath XXXI Days.

With Storms bisfronted Janus doth commence,
 There's none but God can bind the Influence
 Of Sol and Saturn, who on us below
 Will pour some Showers of Rain, or Drifts of Snow;
 For when the Heavens are to Justice bent,
 All Things are turn'd to our just punishment.

FEBRUARY hath XXVIII Days.

I see no reason, why we need to fear
 The usual Storms that in this Month appear.
 God in his Wisdom hath so placed the Stars,
 In such a Posture there's no dread of Jars.
 But yet before the Month doth make an End,
 Venus joins Snibon, as Friend may join with Friend.

M A R C H hath XXXI Days.

If Health, Wealth, Plenty, Peace, and all that's good,
Flow in upon us, if't be not withstood
By our Unthankfulness: then we have cause
Greatly to joy: For by the starry Laws
Of this rare Revolution, it is decreed,
Of our Mistortunes that we shall be freed.

31	5 38	6 22	2 39	

A P R I L hath XXX Days.

Sol, Mars, Jove, Hermes, Chronus, by their Rays,
Pronounce unto Great Britain happy Days.
But yet I fear that Phaeton's fallen Square
To Mars and Stilbon may disturb the Air:
But God, who made the World and rules it still,
To diverse Ends conducts both Good and Ill.

Discite Jusitiam.
First Quarter 2 Day, at 3 Morning

This Month seems to be usher'd with great Expectations of Peace, and his Majesty count- ed thereunto, by Agents from several Parts. But Heaven we fear hath no such Blessing for the Americans, divine Vengeance having not yet scourged them for their former Insolencies.

Fall Moon 10 Day, at 4 Morning.

The Ingress of ☉ into ♋, and the several Lunations of this Month, do rather portend Sea-fights, Wars, &c. than give Hopes of a Peace. They also betoken great Contests amongst Men, tedious and malicious Law-suits; Slaughters and Bloodshed between Armies at

Last Quarter 17 Day, at Midnight.

Land; great Naumachies or Sea-fights; tempestuous and corrosive Air; and regnant Frenzy among a seeming and reli- gious Sort of People. Pray Wonder not at it (Gentlemen!) for I remember upon the like,

New Moon 24 Day, at 4 Afternoon

to have seen formerly a Man in Buff ascen- d a Pulpit, and hold forth to the giddy-headed Multitude. And I fear there are a Genera- tion of People amongst us, that wish to have it so again. *Errorum fugito.*

JULY hath XXXI Days.

Bright Sol eclipsed in a Tropick Sign
Dries Rivers up, and lets Asmodæus reign.
As well as Syrius now, whence mortal Wights
In brutal Pleasures place their prime Delights.
But Jove correcting Hermes, doth distil
Cœlestial Manna for to purge our Ill.

5	25	5 35	11 50	Month is very likely to produce great Va-
6	27	5 33	Morn.	Full Moon 6 Day, at 8 Morning.
7	29	5 31	0 40	riety of News, and from different Parts, but
8	31	5 29	1 31	little to be depended on: for instead of Peace,
9	33	5 27	2 26	which is so much talked of, it seems to be
10	34	5 26	3 22	resolved into Confusion and Disorder, not-
11	36	5 24	4 22	withstanding our Domestick Affairs are better
12	38	5 22	5 22	and more satisfactory. And not without
13	40	5 20	6 22	Last Quarter 13 Day, at 2 Morning.
14	42	5 18	7 21	good Reason, we may now hope of seeing and
15	44	5 16	8 15	enjoying a more flourishing Season, to the Sa-
16	46	5 14	9 7	tisfaction of good and well-disposed People.
17	48	5 12	9 50	The City of London in a prosperous and
18	50	5 10	10 45	healthful Condition, and in a very flourishing
19	52	5 8	11 26	State. Our Merchants make several good
20	54	5 6	0 10	New Moon 20 Day, at 10 Foren.
21	56	5 4	0 55	Voyages into several Parts of the World.
22	58	5 4	1 40	And it may be now hoped, that several Ships
23	0	5 0	2 25	will come home safe, and richly laden with
24	2	4 58	3 12	choice Commodities. Cross Things happen in
25	4	4 56	4 1	Spain, a sickly Time at Rome may be feared,
26	6	4 54	5 1	or some sad Disease in Italy. A sad Face
27	8	4 52	5 41	
28	9	4 51	6 31	First Quarter 28 Day, at 2 Aftern.
29	11	4 49	7 20	seems to attend some high-spirited Grandee,
30	13	4 47	8 8	and another eminent Grandee ends his Days,
31	14	4 46	8 51	or loath his Office.

NOVEMBER hath XXX Days.

When adverse Fortune raise our Hopes and Fear,
And Storms of Fate attack us Front and Rear,
The Great All-Good, in his own Act divine,
We see, through all those cloudy Sorrows shine.
And when it clears again, as oft 'twill do,
We plainly see it then, and own it too.

				troversies.	

DECEMBER hath XXXI Days.

If we consider that the Year runs round,
And by the Planets Aspects, Truth have found,
In good Things, bad Things, Things indifferent,
'Tis that I look'd for, and was my Intent.
I cannot please all, if I please my Friend
I've hit the Mark, so well the Year doth End.

Table of some principal fixed Stars, with the Time they Rise, South and Set, either before or after the Seven Stars; as also their Colour, Magnitude, and Meridian Altitude, by which they may be readily discovered.

Co- lour	Alt.	Mag	Names of the Stars.	Rise		South		Sets	
				h.	m.	h.	m.	h.	m.
♂	53	1	Aldebaran, or Bull's Eye	12	34	02	48	06	00
♂	29	1	Left Foot of Orion	4	31	1	31	1	34
♂	36	2	Middle * in Orion's Belt	4	13	1	51	0	35
♂	45	1	Right Soulder of Orion	3	23	2	8	0	8
♀	21	1	Syrius, the great Dog	6	41	3	1	0	48
♂	43	2	Procyon the little Dog	5	33	3	53	22	7
♂	30	1	Heart of Hydra	8	39	5	41	2	44
♂	51	1	Regulus, Lion's Heart	7	26	6	21	5	16
♂	54	1	The Lion's Tail, Denab	8	42	7	54	7	7
♀	28	1	Virgins Spike	12	46	9	38	6	36
♂	58	1	Arcturus	10	47	10	30	10	12
♂	12	1	Antares, the Scorp. He.	17	36	12	39	7	42
♂	46	2	Bright * of the Vulture	17	38	16	3	9	27
♂	6	1	Fomelhaut	11	14	19	11	10	37
♂	56	2	Head of Andromeda	10	42	10	19	2	56

THE brightest of the Seven Stars is of the third Magnitude, and hath 61 Degrees of Meridian Altitude, and in Colour participates of the δ and η

The fixed Stars all rise, south, and set about four Minutes sooner every Night than they did the Night before; this considered, the exact Time of the Rising, Southing, and Setting for any intermediate Night, not herein noted, may be very easily deduced from these Tables, by Inspection only.

To know the Time of the Rising, Southing, and Setting of any Star in this Table, for any Day required, it is but considering how many Hours and Minutes that Star rises, souths, or sets, either before or after the Seven Stars on that Day, and you will have your Desire; observing that in this Table, *a* stands for *after* and *b* for *before*.

2 A Table shewing the Bearing, Distance, Longest Day, and Difference of Meridians of most of the principal Cities in the World, from the famous City of L O N D O N.

OF the ECLIPSES of the two great Luminaries for the Year 1778.

WITHIN the Circumference of this Year there will be three Eclipses of the Luminaries, two of the Sun, and one of the Moon, and they will happen in the following Order, as they were calculated by my Astronomical Friend, Mr. *Henry Andrews*, at Royfton in Herts.

The first is a visible Eclipse of the Sun, on the 24th of June, in 3 Degees of Cancer, in the Afternoon. The Penumbra first touches the Earth's Disk, and the Eclipse first begins in the Pacific Ocean, in 7 Deg. of North Lat. and $107\frac{1}{2}$ Deg. of Longit. West from London; the Sun will be centrally and totally eclipsed at his rising on the same Ocean, Lat. 12 Deg. $\frac{1}{2}$ North, and Longit $24\frac{1}{4}$ West; the central Shadow directs its Course North Eastward over the Kingdom and Gulph of Mexico, Carolina, Virginia, into the Atlantic Ocean, and thence to the South Part of Newfoundland Fishing Bank, where in the Lat. 41d. 22m. North, and 54d. 22m. West Longitude. The Sun will appear totally eclipsed at Noon Day for the Space of 4 Min. or more, from Newfoundland Fishing Bank the central and total Shade will take a South East Course, passing the Atlantic to the Western Isles, &c. where in the Lat. 20d. $\frac{1}{2}$ and Longit. 21 Deg. East, the central Obscurity ends as the Sun sets: And in Lat. 14 Deg. $\frac{1}{2}$ North, and in Longit. 4 Deg. East, the Moon's Penumbra will quit the Earth's Disk, and the whole Eclipse ends at Sun setting.

In this Island of Great-Britain the Time may be expected as follows, adapted to the Meridian and Latitude of London. The Eclipse begins at 42 Min. after 3, the Middle will be at 35 Min. past 4, and the End will be at 26 Min. past 5, Apparent Time; the Sun will be about half covered a little to the Left on the lower Limb.

The 2d is a Lunar Eclipse, if Clouds interpose not, and visible; it falls on Friday Dec. the 4th, in the Morning. The Time and Manner of its Appearance may be expected to agree with the following Calculation and Construction:

h. d. m.

The Eclipse begins	4 25 19	Apparent Time in the Morning on the Moon's lower Limb.
The Middle	5 37 19	
The full End	6 49 37	
Digits eclipsed	6 12 51	

The third and last is a Solar Eclipse, on Friday the 18th Day of December, about our 10 o'Clock at Night, and consequently invisible to us. It will be a great Eclipse in South America, for in the Latitude of 67 Deg. South, and 151 Deg. of West Longitude from London, the Sun will be centrally eclipsed at Noon-Day, but this Eclipse will be no where total.

Divine Urania, pray give Consent
 For to contemplate the Firmament,
 The Starry Science is that Part I chose,
 Since none that's wife and learn'd doth it oppose:
 Its Enemies are few, Votaries many,
 Its noble Structure's scarce envy'd by any.
 Then as for such as ne'er speak well of none,
 Tho' Scorn's their due, I'll let those Fops alone;
 And take a Turn in the Uranian Court,
 Where Art and Nature frequently resort;
 And there observe the Motion of each Sphere,
 As in their Orbs and Order they appear:
 Their Influence we're curious for to know,
 How they incline us Mortals here below.
 When the Wars will be o're, and where Peace doth last,
 Of which few tell us that the worst is past.
 Wars in some Places still seems coming on,
 Rapine and Murders neither fled nor gone.
 What here is said is from th' Erratick Stars,
 Hence see what follows, whether Peace or Wars.

I shall give you my Judgment of these visible Eclipses whose Figures are delineated on the other Page, and first of the Solar, which is celebrated in the 8th House, in 3 Deg.

of Cancer. Now my Author says, that *Eclipsis Solis in 6 denario primo, bellum omnino concitat.* It irritates Mens Minds to Wars, Opposition, Treachery, &c. and this the rather, in regard that Mercury, Lord of the Angle preceding, is in the 7th, and Mars is falling into the 7th also. There are a Sort of People born into the World to be Plagues to those they live among, and to the Government they live under, and receive Protection from whom neither the Fear of God, or Favour of Man, Religion, or Indulgence can oblige, nor yet the sad Examples of hanging, &c. can terrify or deter them from their wicked or rebellious Principles. I say once more, let them look to it, they will not find Authority in a Humour of forbearing or forgiving always. I remember a Passage in *Nostradame Cent. 5. Quadrin. ult.* which accords with this Cælestial Menace, viz.

Le boutefeu par son feu attrapé.

Which may admit of this English :

The Incendiary shall be burnt by his own Flames.

I say the several eminent and repeated Signs of Heaven against Incendiaries, mutinous and rebellious Persons, both at Home and beyond the Atlantic, do most assuredly affirm their Ruin and Destruction, if they shall not study to be quiet, and leave meddling in State Matters to those whom it belongs, and be doing their own Business: And this not in Cabals, and Coffee-Houses, but in their several Shops and Habitations, there providing honestly for their Families, paying the same Obedience to their Governors in Church and State, (like dutiful Sons) as themselves most duely exact and expect from their Children and Servants. Be they but so wise as to follow this Rule, the Government would be easy, and themselves may happily escape the just Rewards due to an obstinate and rebellious People.

And so I now come to the Lunar Eclipse, but as it is so near the Year's End, and the Effects will be mostly shewn in the next Year, so I shall only speak a few Words of it: It signifies the Death of some great Princess, &c. the Degradation of sundry Female Personages, with Clouds of Obloquy upon their Honours, whose Genitures conspire therewith; but I must forbear, having other Things to treat of in my Book.

You see in my Emblems that the Doves are flying with Olive Branches in their Mouths, which shews, in my Opinion, that a Time of Peace is near at Hand; and that now, those that have encouraged the War may beat their Spears into

Pruning Hooks, and their Swords into Plow Shares : And I hope in a little Time to hear of such an universal Peace, that the Wolf may once more dwell with the Lamb, and the Leopard lie down with the Kid, and the Calf and the young Lion and the Fatling together, &c. Peace will certainly bring Plenty, and nothing can disturb our Quiet but the unruly Moles and restless Bats, both at Home and Abroad.

There is a Prophecy of *Michael Nostradamus*, who was Physician to three Kings of France, and is as follows; which is fulfilling near these Times, which you may find is the last of the second Century.

*Dedans les Isles si horrible Tumulte,
Rien on n'orra qu'une bellique brigue ;
Tant grand sera des predareurs l'Insult,
Qu'on se viendra ranger a la grand Ligue.*

In English, thus :

*In the Islands shall be so horrid Tumults,
That nothing shall be heard but a warlike Surprise ;
So great shall be the Insults of the Robbers,
That every one shall shelter himself under the great League.*

ANNOTATION.

This is plain, if by the great League you understand the soundest and most powerful Party.

In the next Place I shall give you an Account how the Cælestial Bodies are disposed in the Year 1778, and what they may probably seem to signify unto the lower World ; but by Reason the most Part of the Winter Quarter falls after the Date of New Almanacks, I begin with it first.

NOW this Quarter enters at such Time as the Sun touches the first Point of Capricorn, which is on December the 21st, at 20 Min. past 10 in the Forenoon, 1777, at which Time 6 Deg. of Sagitary culminates, and 8 Degrees of Aquarius ascends, and the Moon is going to the Square of the Sun and Mercury, and the most material Aspects at this Ingress are a Trine of the ☉ and ♃, and a Square of the two Infortunes, from Aquary to Scorpio, 2 fixed Signs; the two malevolent Planets have most Pre-dominancy at this Time, and there is a mutual Reception between them, though by a Square Aspect; how fairly Things seem carried on for Friendship and mutual Agreements, and yet how many fraudulent Designs are in Agitation near these Times? And I do say, that of late many Differences and Controversies have been managed, oecultly and fraudulently, by our Foreign and Domestick Enemies, to the Prejudice and Disadvantage of all good and true Englishmen; but whether these hypocritical or furious Spirits are now either wearied or tired, or perfectly discovered, and their unnecessary dividing Projects, or ashamed of their former Attempts and Disturbances, Things begin to look more amicable; many sober wise Persons ballancing, and overpowering the Animosities and peevish Juglings of those Quondam Zealots, and over fierce Spirits, who have endeavoured, upon mistaken Axioms, and un-found Principles, to have subverted the Peace and Tranquility of our Foreign Dominions, as well as at Home: And I must also tell you that the Planet ♃ is powerful at this Ingress by being in Reception of ♄, his Motion is swift, and as he is an Enemy to Old England, therefore the Actions of those Enemies whom he doth signify, will be prosecuted with much Subtilty, Craft, Disimulation, with Patience, Labour, and great Difficulty, with many Delays and much Procrastination of Time, especially during the Months of December, January, and February, wherein those signified by him will much prejudice Mankind, or or those under his or their Subjection, with many heavy Burthens, Taxes, and other Enormities, harmful and prejudicial, and thereby raise some Uproars or Commotions amongst the Vulgar, but for the Comfort of England, Mars is the better and more valiant Seaman and Soldier, Saturn being naturally a dull heavy Fellow, and a slovenly Coward, and ever faint-hearted. Forasmuch as Mars is posited in the Ascendant in the prime Angle of Heaven, from hence I

judge the greatest Transactions of Europe will be managed by his Majesty of England, his Counsellors and Conductors, both as to War and Peace, with great Magnanimity and Haughtiness of Spirit, as unto the Martial Part, with as much Gravity and Prudence in the Civil Part: And by the Position of the Sun and Jupiter, here is great Hopes of powerful Assistance (if his Majesty's Occasions require it) of some Northern or Eastern Prince or People. The general Affairs of Christendom seem to be managed something confusedly, in England with great Courage and Vivacity of Spirit, with Sincerity and upright Hearts and Intentions. In some Countries Matters are carried on with high Words and great Brags and Boastings; in other Places with nothing but Deceit, Fraud, juggling, and underhand Dealing; in other Places with subtle Delays, Treacheries, and feigned Devices; however, great Preparations are ordering, as well for the Sea as for the Land. For the major Part of this Year we must expect military Actions to follow the Nature of Mars and Saturn, they both being malignant in Influence, and they in their Natures are destructive to human Kind, both unto Purse and Person; they are both essentially strong by Reception, the greater Mischief they are capable therefore of effecting, *Quoniam ab eis descendunt majora significata quam ab aliis, licet enim alii participant cum eis tamen Virtus eorum est valde major, atque fortior Virtute Inferiorum*, viz. Greater and more high Affairs or Effects transend from these two Planets than from others, for though other Planets participate in Operation with them, yet is their Virtue in Effects and Actions so transcending their Inferiors, be it in any Matter, Cause, Accident or otherwise.

It is the Nature of Saturn to afflict Mankind with tedious Quartan Agues, Consumptions, lingering, pining and melancholly Distempers, weakening Man's Purse, and consuming his Fortune with unexpected Casualties; these Things and Diseases he is like to be the Fore-runner of in this Winter Quarter; high Honour is done to some Ecclesiastical Person in Foreign Parts, and the like Advancement to some of our own Nation, either Civil or Temporal.

Many Reports fly abroad as if some Treaty of Peace were in Hand, People willingly embrace that Intelligence, but Time makes it appear a Vapour. Our Enemies have not yet had a sufficient Share of Celestial Influence, let them expect it with Interest in the next Summer, for I am of the Orator's Opinion, who says:

Peace makes a pleasant Sound well understood,
 But Discord better, if the Peace not good ;
 I am not of that Humour to prefer
 The unjustest Peace before the justest War.
 Admit I am rifled, rob'd of all Relief,
 Must I need's patch a Peace up with the Thief.

It has been the Opinion of some sober Men, that the Number 8 carries a Signification of good Import to the British Nation, and Protestant Religion, and there may be perhaps some greater Mystery in Numbers than what we are aware of, the Antients used to make a great Account thereof, and the Scripture does not disfavour the Opinion.

If History we search, we there shall find,
 This Number ever to our Church was kind ;
 If ancient Stories we to Mind do call,
 Of moral Nature, or of mystical :
 We still shall find the Number 8 to be
 Averse to Rebellion and to Treachery.
 In 58 the French King John was found,
 To be a Pris'ner here on English Ground.
 In 58 was that renowned Queen
 Elizabeth, in regal Power first seen.
 In 88 came Spain's proud Armado,
 With Brags against our Church, and great Bravado.
 In 88 that Number of Salvation
 King William, came to save our Church and Nation.

Of the Summary of Eight.
 This Island was conquered and named,
 Our Ancestors were therein settled.
 Christianity were herein first propagated,
 Christian Persecution removed.
 The Spanish Armado was routed.
 Conspiracies were discovered.
 Protestant Governors were crowned,
 Victories against our Enemies obtained.
 Popery and Superstition were abdicated,
 Mass houses were demolished.
 True Religion were re-established.
 Our Protestant Faith defended.
 Our Church and People were saved,
 And our Laws and Liberties preserved.
 Most surely shall our Church in Safety stand,
 That's thus protected by the Almighty Hand ;
 And let us hope this New Year 78,
 Will quash Disturbance both in Church and State.

Of the VERNAL or SPRING QUARTER,
WHICH commences at such Time as bright Phæbus
 mounts the first Scruple of the Equinoctial Sign
 Aries or the Earth, Libra, which happens this Year on the
 20th Day of March, at 8 Min. after Noon, at which
 Time the latter End of Cancer ascends the Horzion, and
 the Beginning of Aries on the Medium Cœli, and the
 Planets are posited as are shewn in the following Figure.

In this Cælestial Scheme we have Mars the Patron of England mounted on the Medium Cœli, and the Sun and Venus on the Cusp, and 4 in the 2d in Trine to Mars and the Sun by Application, and Saturn, the American's Significator, is depressed and Retrograde in the 5th in Scorpio, in the Domicil of Mars, and the Moon is going from the Trine of 4 and ♂, and applying to the □ of ♀, which particular Positions are significant, and worthy of the Consideration of the judicious. Bonatus observes, that when the Sun is in the 10th *significat honorem Regumq; eorum exaltationem atq; eorum Gloriam et profectum.* The Sun who generally signifieth the most eminent Persons of Nations, as Kings, Princes, Prime Rulers, Governors, Chief Magistrates, as now posited, manifests their Honour, Reputa-

tion, and Fame in that Year, their Glory, and obtaining Prosperity. Now, if according to the Rules of Astrology, we observe the New and Full Moon's preceding and succeeding the Solar Ingress, we shall be the more able to give Judgment of the whole State and Condition of the Year following; I have made Choice of the Novilunium succeeding, which is upon Saturday the 28th of March, at 15 Min. past 4 in the Afternoon, which is most consonant to Reason, and is in Sextile to the Solar Ingress. All the Planets, the Moon and Mercury excepted, are not much varied from their Places. The Moon at the Ingress was going from Δ of Υ and δ , and applying to \square of φ , now she is applying to the Conjunction of φ and Δ of Υ and δ , a most admirable Position, all of them are mixt in friendly Configuration: And if we should retrocalculate for 600 Years, we should not meet with such a wonderful Position of expected good Success in Omnibus, in all the Kings Reigns since William the Conqueror. To be short, it signifies Health, Wealth, and Prosperity both to King and People, Victory over Enemies, or Agreement betwixt those that have been at Odds, perfect Amity amongst Friends, notable Occurrences about Ecclesiastical Affairs, and results about Religion; the Preferment of some pious and religious Persons, happy Navigations, and prosperous Returns of many rich Ships, to the King's great Profit, and Weal of the Publick, many notable Embassies from Foreign Parts concerning high Matters, to the great Joy and Content of all, from the highest to the meanest. God may alter the Course of Nature, as he did in the Days of Josuah, and Hezekiah, but those are Miracles which are ceased in our Days. I trust in God, the Events prenoted will answer the Position. I could enlarge much upon this Revolution in the general, but then I shall be strained in my other quarterly Observations: As to the Fate of particular Persons, it were well worth the noting, if the Genitures could be obtained; but *hic Labor, hoc opus*, which brings me to the Consideration of the next. which is the

SUMMER QUARTER.

WHICH enters at such Time as that glorious Monarch of the Cælestial Orb, the Sun, enters the first Point of Cancer, making now the longest Day with us, and is this Year, on the 21st of June, at 20 Min. past 10 in the Forenoon, at which Time 13 Deg. of Virgo ascends, and 7 Deg. of Gemini culminates, Saturn is posited in the 3d,

II in the 12th, and Venus in the 11th, and the Moon in the 9th, and the Sun, Mars, and Mercury in the 10th; thus stands the Position of the Heavens at this Time, from hence I infer, that these three Months seem almost totally governed by the Influence of Mars, he being now in a humane Sign, *vide Bonat. pag. 569. of ♄ when in II and in the 10th House, as in II. Significat quod quicquid ipse significaverit, erit Eventus eorum in partibus occidentalibus*; whatever he doth signify it shall be in the Western Parts. *Significat Impedimentum casurum in hominibus causâ tonitruorum et fulgorum*, great Danger will fall upon Mankind by Reason of Thunder and Lightning; it might have been well and tolerably Englished, by Shot of great Guns, which do both thunder and lighten; *gravitatem caloris et ejus noxam*, extream Heat and Harm thereby; *erunt bella et contentiones atque latrocinia in partibus septentrionalibus, exaltabiturque Rex illorum in Revolutione illâ*, there will be Wars and Contentions, Rapines and Thieveries in the Northern Parts, that King who rules over Gemini (and that is the King of England) shall be exalted and much magnified in that Revolution; *et habebit victoriam de inimicis suis*, shall be victorious over his Enemies; *et erunt dolores aurium*, Men shall be grieved with Pains in their Ears, *similiter pustulæ, &c.* the Small-pox shall be frequent and common, and many infirmed with Carbuncles and Ulcers, and some with the King's Evil. I might more, but it were *Actum agere*.

Vivat Rex Magnæ Britanniae.

OF THE AUTUMNAL QUARTER.

WHICH this Year begins September the 22d near Midnight, at which Time the latter End of Pisces culminates, and 25 Deg. of Cancer ascends on the Eastern Horizon. At this Ingress I find the Angles partly moveable, and partly fixed, all the Planets posited under the Earth, the Moon deflexing from the Sextile of Mars, to the same Aspect of Jupiter and the Body of Saturn, Venus and Saturn are conjoined in Scorpio, and Jupiter is in Sextile to them both; these are the most remarkable Things to be considered in the Scheme itself: Hence I judge many deliberate Councils and sober Consultations concerning the Affairs of Nations, such as concern Laws, Customs, Religion, &c. will take up the greatest Part of this Quarter; God direct thote Persons that have the Honour to be the Moderators and Judges herein.
